DETAILED ACTION

Status of claims

1. Claims 1-3 and 6-26 are pending and are restricted.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, 6-11, and 23-28 are drawn to a combination product comprising as pharmaceutically active ingredients at least one active ingredient component A and at least one active ingredient component B, wherein active ingredient component A is a direct stimulator of soluble guanylate cyclase having the formulation I.

Group II, claim(s) 12, drawn to a method of increasing the efficacy of direct soluble guanylate cyclase stimulators of formula I comprising administering a lipid-lowering agent with the direct soluble guanylate cyclase stimulator.

Group III, claim(s) 13, drawn to for producing composition as recited in claim 1 comprising converting at least one lipid-lowering agent and one direct soluble guanylate cyclase stimulator of formula I.

Group IV, claim(s) 14-16 and 18, drawn to a method of treating a cardiovascular disorder (i.e., hypertension, thromboembolic and arterosclerosis comprising administering an effective amount of a combination of a direct stimulator of soluble guanylate cyclase of formula I and a lipid-lowering agent claim I.

Group V, claim(s) 17 drawn to drawn to a method of treating sexual dysfunction comprising administering an effective amount of a combination of a direct stimulator of soluble guanylate cyclase of formula I and a lipid-lowering agent claim I.

Group VI, claim(s) 19, drawn to drawn to drawn to a method of treating osteoporosis comprising administering an effective amount of a combination of a direct stimulator of soluble guanylate cyclase of formula I and a lipid-lowering agent claim I.

Group VII claim(s) 20, drawn to drawn to drawn to a method of treating inflammation comprising administering an effective amount of a combination of a direct stimulator of soluble guanylate cyclase of formula I and a lipid-lowering agent claim I.

Group VIII, claim(s) 21, drawn to drawn to drawn to a method of treating central nervous system comprising administering an effective amount of a combination of a direct stimulator of soluble guanylate cyclase of formula I and a lipid-lowering agent claim I.

3. Claim 22 is generic to claims 14-21

4. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the compound of formula is not novel, see US 6,743,798 which describes the compounds of instant formula I for improving learning and memory performance.

Therefore, a holding of lack of unity amongst the inventions of Groups I and II is proper.

The following claim(s) are generic: Claim 22 is generic to claims 14-21

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder**. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
